A Map of Tools Available for Windows 2000 Server

Jolene Patterson
November 22, 2000

Introduction:

The goal of this document is provide a single location to find information on the tools available for Microsoft Windows 2000 Server. This document is an attempt to map the information available from a variety of sources, including Windows 2000 Operating System CD, Windows 2000 Resource Kit CD, Windows 2000 Resource Kit Companion CD, and the Microsoft Web Site.

The information provided is in table form and includes descriptions of the file name (or web link), which group of tools it belongs to (Support Tools, Resource Kit, etc.), where the file is located, if the file is provided free with the operating system CD or must be purchased or found elsewhere, if separate – a downloadable location when available, the name of the tool, a brief description of the tool, the category the tool category (Performance, Network Management, etc.), and finally, any files that are required to run the file in question.

File Name	Web Link	Groups of Tools	Location of Tools	Provided with W2K Server or Separate	If Separate – download available?	Name of Tool	Description of Tool	Category of Tool	Additional Files Required
acldiag.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		ACL Diagnostics	This command-line tool helps diagnose and troubleshoot problems with permissions on Active Directory objects. It reads security attributes from access control lists (ACLs) and writes information in either readable or tab-delimited format.	Diagnostic	
adsiedit.msc		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		ADSI Edit	ADSI Edit is a Microsoft Management Console (MMC) snap-in that acts as a low-level editor for Active Directory. Using Active Directory Service Interfaces (ADSI), it provides a means to add, delete, and move objects within the directory services. The attri	Network Management	adsiedit.dll
apcompat.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows	System		Application Compatibility Program	This program is designed to overcome the most common causes of application incompatibility with Windows 2000. You can use this tool with a Windows interface by running the Application Compatibility	Deployment	

			2000 Server Operating System CD				program, or you can run this program as a command-line to	
apmstat.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Advanced Power Management Status	This command-line tool provides status information on Advanced Power Management (APM) features. In Windows 2000, APM is primarily intended to support older notebook computers, while Advanced Configuration and Power Interface (ACPI) is the default power man	Diagnostic
browstat.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Browser Status	BrowStat is a general purpose, character-based browser diagnostic tool. Use BrowStat to find out whether a browser is running and to find active Microsoft Windows for Workgroups (WFW) browsers in Windows 2000 and Windows NT domains. This tool also provide	Diagnostic
clonepr.dll		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		ClonePrincipal	This tool assists administrators in migrating users from Windows NT to Windows 2000 by creating clones of the Windows NT 4.0 users and groups in the new Windows 2000 environment. Customers deploying Windows 2000 may want to migrate users incrementally to	Deployment	clonegg.vbs, cloneggu.vbs, clonelg.vbs, clonepr.vbs, sidhist.vbs
dcdiag.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Domain Controller Diagnostic Tool	This utility analyzes the state of domain controllers in a forest or enterprise and reports any problems to assist in troubleshooting. As an end-user reporting program, DcDiag encapsulates detailed knowledge of how to identify abnormal behavior in the sys	Diagnostic
depends.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Dependency Walker	This tool scans any 32-bit or 64-bit Windows module (including .exe, .dll, .ocx, and .sys, among others) and builds a hierarchical tree diagram of all dependent modules. For each module found, it lists all the functions that are exported by that module, a	Diagnostic	depends.cnt, depends.hlp, dwinject.dll
dfsutil.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Distributed File System Utility	This tool enables administrators to query and troubleshoot the Microsoft Distributed file system (Dfs) from the command prompt. It can be used to perform maintenance of a Dfs root and to clean up metadata left behind by orphaning or abandoning domain-base.	File & Disk
dnscmd.exe		Microsoft	Support\Tool	System		DNS Server	Dnscmd.exe is a command-line tool designed to	Network

		Windows 2000 Support Tools	s directory of the Microsoft Windows 2000 Server Operating System CD			Troubleshooting	assist administrators in Domain Name System (DNS) management. DNScmd allows the administrator to view the properties of DNS servers, zones, and resource records. In addition DNScmd can be used to manually mod	Management	
dommiq.doc		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Planning Migration from Microsoft Windows NT to Microsoft Windows 2000	This paper outlines planning considerations and guides administrators through the planning process for migrating Windows NT 3.51 and Windows NT 4.0 domains to Windows 2000 in an enterprise environment. New Windows 2000 tools and technologies make migration	Deployment	
dsacls.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		DsAcls	This tool facilitates management of access control lists (ACLs) for directory services. DsAcls enables you to query and manipulate security attributes on Active Directory objects. It is the command-line equivalent of the Security page on various Active Directories.	Network Management	
dsastat.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		DsaStat	This diagnostic tool compares and detects differences between naming contexts on domain controllers. DsaStat can be used to compare two directory trees across replicas within the same domain or, in the case of a Global Catalog, across different domains.	Network Management	
dskprobe.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		DiskProbe	DiskProbe is a sector editor for Windows 2000. It allows a user with local Administrator rights to directly edit, save, and copy data on the physical hard drive that is not accessible in any other way. This tool can help you prepare for disk-based proble	File & Disk	dskprobe.cnt, dskprobe.hlp, dskprtrb.doc, mfo40.dll, msvcrt40.dll
dumpchk.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Dump Check	This command-line debugging tool enables you to verify that a crash dump (user mode:user.dmp or kernel mode:memory.dmp) has been created correctly. It also provides options for performing some dump file analysis without using a debugger.	Computer Management	kdextx86.dll, msdis110.dll
filever.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server	System		FileVer	This command-line tool examines the version resource structure of a file or a directory of files on either a local or remote computer and displays information on the versions of executable files such as .exe files and dynamic-link libraries DLLs.	File & Disk	

			Operating System CD					
gflags.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Global Flags Editor	GFlags is a GUI utility that enables a developer or system administrator to edit the NtGlobalFlag settings for Windows 2000. You can use GFlags to modify the current flags in use by the kernel or the flags used when a particular image file is launched.	Diagnostic
kill.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Task Killing Utility	Use this command-line tool to end one or more tasks or processes. Processes can be killed by the process ID number (PID), or by any part of the process name or the name of the window in which it is running (usually the title of the application's main wind	Computer Management
ksetup.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Kerberos Setup	KSetup is a command-line tool that configures Windows 2000 clients, either Server or Professional, to use an MIT Kerberos server. The Windows 2000 client then uses an MIT-based Kerberos realm instead of a Windows 2000 domain. This provides a single sign-	Network Management
ktpass.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Kerbos Keytab Setup	KtPass is a command line configuration tool used to generate Kerberos keytab files, and set password and account name mappings for UNIX services that will use the Windows 2000 Kerberos Key Distribution Center (KDC). It is part of a group of tools.	Network Management
ldp.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Active Directory Administration Tool	Ldp is a graphical tool that allows users to perform Lightweight Directory Access Protocol (LDAP) operations, such as connect, bind, search, modify, add, and delete, against any LDAP-compatible directory, such as Active Directory.	Network Management	ldp.doc
memsnap.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Memory Profiling Tool	This memory-profiling tool takes a snapshot of the memory resources being consumed by all running processes and writes this information to a log file. MemSnap logs system memory usage to a log file with the default name of Memsnap.log	Computer Management
movetree.exe		Microsoft Windows	Support\Tools directory of	System		Active Directory Object Manager	The Active Directory Object Manager (MoveTree) is a command-line tool that allows administrators to move	Network Management	movetree.dll

		2000 Support Tools	the Microsoft Windows 2000 Server Operating System CD				Active Directory objects such as organizational units and users between domains in a single forest.		
msicuu.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Windows Installer Cleanup Utility	The Windows Installer Cleanup Utility allows you to safely remove Windows Installer settings from your computer in the event of a problem. If you experience installation problems, you can use this tool to remove registry entries	Computer Management	msizap.exe
msinfo32.exe		Microsoft Windows 2000 Support Tools	\Program Files\Common Files\Microsoft Shared\MSInfo where W2K is installed	System		System Information	System Information retrieves and reports your system configuration information for your hardware, system components, and software environment.	Diagnostic	
msizap.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Windows Installer Zapper	This is the command-line tools for the Windows Installer Cleanup Utility. It allows you to safely remove Windows Installer settings from your computer in the event of a problem.	Computer Management	msicuu.exe
netdiag.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Network Connectivity Tester	This command-line diagnostic tool helps isolate networking and connectivity problems by performing a series of tests to determine the state of your network client and whether it is functional. These tests and the key network status information they expose	Diagnostic	
netdom.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Windows 2000 Domain Manager	This tool enables administrators to manage Windows 2000 domains and trust relationships from the command line.	Network Management	
nltest.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server	System		NlTest	This command-line tool helps perform network administrative tasks such as: 1) getting a list of primary domain controllers (PDCs), 2) forcing a shutdown, 3) querying and checking on the status of trust, 4) testing trust relationships and the state of do	Network Management	

			Operating System CD						
pmon.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Process Resource Monitor	Process Resource Monitor (PMon) is a command-line tool that monitors process resource usage by tracking CPU and memory usage. Pmon can be used to measure paged and non-paged pool usage and can be helpful in identifying kernel mode memory leaks.	Performance	
poolmon.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Poolmon	This tool monitors memory tags, including total paged and non-paged pool bytes. Poolmon is often used to help detect memory leaks. Unlike most command-line tools, help for Poolmon is available after running poolmon.exe by typing "h" or "?".	Computer Management	msdis110.dll, msvcp60.dll
pptpclnt.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Point-to-Point Tunneling Protocol Ping Utilities (PPTP Ping)	Pptpclnt.exe and Pptpsrv.exe are tools that work in unison to verify that the required protocol and port for Point-to-Point Tunneling Protocol (PPTP) is being routed from a PPTP client to a PPTP server or vice-versa.	Diagnostic	pptpsrv.exe
pptpsrv.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Point-to-Point Tunneling Protocol Ping Utilities (PPTP Ping)	Pptpclnt.exe and Pptpsrv.exe are tools that work in unison to verify that the required protocol and port for Point-to-Point Tunneling Protocol (PPTP) is being routed from a PPTP client to a PPTP server or vice-versa.	Diagnostic	pptpclnt.exe
pviewer.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Process Viewer	Process Viewer is a Windows-based tool that displays information about a running process and allows you to stop (kill) processes and change process priority.	Performance	
reg.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Registry Console Tool	This tool enables you to add, change, delete, search, save, restore, and perform other operations on registry entries from the command prompt or a batch file. It can be used on both local and remote computers.	Computer Management	
remote.exe		Microsoft Windows	Support\Tools directory of	System		Remote Command Line	Remote allows you to run command-line programs on remote computers.	Network Management	

			2000 Support Tools	the Microsoft Windows 2000 Server Operating System CD				
repadmin.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Replication Diagnostic Tool	This command-line tool assists administrators in diagnosing replication problems between Windows 2000 domain controllers.	Network Management	
replmon.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Active Directory Replication Monitor	This tool enables administrators to view the low-level status of Active Directory replication, force synchronization between domain controllers, view the topology in a graphical format.	Network Management	comctl32.ocx, comdlg32.ocx, ctl3d32.dll, iadstools,dll, iadstoos.doc
rsdiag.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Remote Storage Diagnostic Utility	This command-line tool examines Remote Storage (HSM) databases and displays diagnostic information about jobs, managed volumes of the version of NTFS file system used in Windows 2000, removable media, and other Remote Storage information useful for system	File & Disk	rstools.dll
rsdir.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Remote Storage File Analysis Utility	This command-line tool examines Remote Storage reparse points, displaying Remote Storage information for files in the current directory and its subdirectories	File & Disk	rstools.dll
sdcheck.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Security Descriptor Check Utility	This command-line tool displays the security descriptor for any object stored in Active Directory. The security descriptor contains the access-control lists (ACLs) defining the permissions that users have on objects stored in Active Directory.	Network Management	
search.vbs		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating	System		Active Directory Search Tool	This VBScript tool performs a search against an Lightweight Directory Access Protocol (LDAP) server. An administrator or any user who wants to get information from Active Directory can use it. Search.vbs requires Windows Script Host (WSH).	Network Management	

			System CD						
showaccs.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Security Administration Tools (SIDWalker)	Showaccs is a command-line program that enables users to examine the access control lists (ACLs) on the registry, file system, and file and print shares, and to look at membership in local groups. Showaccs command options support looking at specific areas	Deployment	msvcrt50.dll
sidwalk.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Security Administration Tools (SIDWalker)	This set of programs helps system administrators manage access-control policies on Windows 2000 and Windows NT systems. Access control is implemented by access control lists (ACLs).	Deployment	msvcrt50.dll
sidwalk.msc		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Security Migration Editor	The Security Migration Editor is a Microsoft Management Console (MMC) snap-in that provides a graphical user interface (GUI) for mapping old security identifiers (SIDs) listed in a mapping file created by Showaccs to new security identifiers.	Deployment	
sidwkr.dll		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Security Migration Editor	Sidwkr.dll is the snap-in file for Security Migration Editor. Security Migration Editor requires MMC, which is available for Windows 2000 or Windows NT 4.0.	Deployment	
snmputilg.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		SNMP Query Tool	The SNMP Utility Tool (SNMPUtilG) is a graphical tool that complements the older command prompt SNMP browser tool (Snmputil.exe). System administrators can use either tool to obtain information from SNMP-manageable systems on the network.	Diagnostic	
tlist.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Task List Viewer	This command-line tool displays a list of tasks, or processes, currently running on the local computer. For each process it shows the process ID number, process name, and if the process has a window, the title of that window.	Computer Management	
W2000msqs.chm		Microsoft Windows 2000 Support	Support\Tools directory of the Microsoft	System		Windows 2000 Error & Event Message Help	This HTML Help file lists most of the error and system-information messages generated by Windows 2000, providing explanations of each message and	Computer Management	

		Tools	Windows 2000 Server Operating System CD				suggestions on how to correct the problem		
windiff.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		WinDiff File & Directory Comparison	WinDiff shows the differences between specified ASCII text files or folders of ASCII text files. This is particularly useful for program source code.	File & Disk	windiff.hlp, gutils.dll
winrep.exe		Microsoft Windows 2000 Support Tools	\Winnt folder of the drive on which Windows 2000 is installed	System		Windows Report Tool	The Windows Report Tool (WinRep) is an Internet-based problem reporting tool built into the Windows 2000 operating system. WinRep enables users to enter information about a computer problem, take a snapshot of their current configuration settings, and the	Diagnostic	br549.ocx
wsremote.exe		Microsoft Windows 2000 Support Tools	Support\Tools directory of the Microsoft Windows 2000 Server Operating System CD	System		Winsock Remote Console	The Winsock Remote Console provides the ability to start a console application on the server and connect to it from the client using sockets or named pipes. This is an enhancement over Remote Command Line (Remote.exe)	Network Management	
activeperl.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Active Perl Scripting Language	C-like scripting language ported from UNIX to Windows 2000.	Scripting	
addiag.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Application Deployment Diagnosis	Provides information on current state of software either installed or available for installation on a PC managed by IntelliMirror Software Installation and Maintenance.	Diagnostic	
addusers.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Add Users	Adds multiple users from a comma-delimited text file.	Network Management	
apimon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Apimon.exe: API Monitor	API Monitor	Monitors the API calls made by a process.	Diagnostic	
appsec.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Appsec.exe: Application Security	Application Security	Sets user permissions on a file-by-file basis to lock down accessible applications.	Computer Management	
associate.exe		Windows 2000	Microsoft® Windows®	Separate		Associate	Adds "file extension, executable program" associations to the registry.	File & Disk	

		Resource Kit Tools	2000 Resource Kit						
atanlyzer.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		AppleTalk network device ANaLYZeR	Analyzes AppleTalk Devices.	Diagnostic	
atmarp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Windows ATM ARP Server Information Tool	Used to troubleshoot the status of the ATM ARP/MARS Service that ships with Windows 2000.	Network Management	
atmlane.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Windows ATM LAN Emulation Client Information Tool	Used to troubleshoot the status of the ATM LAN Emulation (LANE) client that ships with Windows 2000.	Network Management	
auditpol.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Audit Policy	Enables user to modify the audit policy of local or remote computers	Diagnostic	
autoexnt.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		AutoExNT Service	Allows you to start a custom batch file at startup without having to log on to that computer.	Scripting	
browmon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Browser Monitor	Monitors the status of browsers on selected domains.	Diagnostic	
cachemov.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Offline Files Cache Mover	Allows user to move offline files cache to a different drive volume.	Computer Management	
cconnect.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Con-Current Connect Limiter	Provides a method of tracking concurrent connection of users and monitoring what computers users are logged into.	Network Management	
chklnks.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Link Check Wizard	Scans all of the shortcut (link) files on a computer and lets user remove dead ones.	Desktop	
choice.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		User input for Batch Files	Prompts user to make a choice in a batch program.	Scripting	
ckymunge.dll		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Cookie Munger	Enables Active Server Pages (ASP) to work with browsers that do not support cookies or that refuse to accept them.	IIS - Internet Information Services	

cla.msc		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Cybersafe Log Analyst	Assists in organizing and interpreting security event logs from Windows 2000 by analyzing and generating detailed reports.	Diagnostic	
clearmem.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Clear Memory	Forces pages out of RAM.	Performance	
clip.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Clip to Clipboard	Dumps STDIN to Clipboard	File & Disk	
clippool.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Clip Pool	Transparently shares a single logical clipboard among multiple computers.	Network Management	
cliptray.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Clipboard Organizer	Stores and organizes chunks of text that can be copied into text-based files using the Clipboard.	File & Disk	
clusrest.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Clusrest.exe: Cluster Quorum Restore Utility	Cluster Quorum Restore Utility	Restores the quorum disk of a cluster, which is not done by a restore process using NtBackup.	Network Management	
clustsim.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Cluster Verification Utility	Verifies that two-node cluster systems are set up properly.	Diagnostic	cvu.txt, ntlog.dll, setup.exe, wpcvp.cnt, wpcvp.exe, wpcvp.hlp
various		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit companion CD.	Separate		Cluster Sentinel	An application-layer monitoring system, integrated with NLB clustering technology that monitors the health of servers and tracks server availability. This application-layer monitoring system integrates with Network Load Balancing clustering technology,	Diagnostic	
clustool.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Microsoft Cluster Tool	Backs up and restores cluster configurations and migrates resources from stand-alone servers to a cluster.	Network Management	
cmdhere.inf		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Command Prompt Here	Adds a "CMD Prompt Here" item to some right-click menus displayed by Windows Explorer.	Desktop	
compress.exe		Windows	Microsoft®	Separate		File Compression	Compresses files.	File & Disk	

		2000 Resource Kit Tools	Windows® 2000 Resource Kit			Utility			
confmgr.htm		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		IP Multicast Conference Management Tool	Manages IP Multicast conferences.	Network Management	
copslpm.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Common Open Policy Service Local Policy Module	Enables a COPS-based Policy Server to provide admission-control decisions to a Windows 2000 ACS for RSVP requests.	Network Management	
counters.chm		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Windows 2000 Performance Counters Reference	Presents descriptions of all of standard performance counters installed with Windows 2000.	Performance	
cpustres.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		CPU Stress Utility	Consumes processor cycles continuously by executing an endless loop.	Performance	
creatfil.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Create File	Creates files of a specified size.	File & Disk	
crw.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Crystal Reports	Enables you to create, view, and distribute presentation-quality or Web-ready reports from varied data sources. Seagate Crystal Reports Event Log Viewer is a full-featured report writer that provides an easy way to extract, view, save, and publish information	Desktop	crpe.dll
tpc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Third-Party QoS Control Agent	Allows an administrator to manage Quality of Service (QoS), including Create, Remove, Update, and Query sessions, from the command prompt.	Network Management	ctpc.exe
ctrlist.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Counter List	Lists all objects and counters installed in the system for the given language ID.	Performance	
cusmgr.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Console User Manager	Enables editing of many of the Local Users and Groups user properties from the command line.	Network Management	
dcdiag.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Domain Controller Diagnostic Tool	Assists in analyzing and troubleshooting domain controller problems in an enterprise environment.	Network Management	
defptr.exe		Windows	Microsoft®	Separate		Default Printer	Shows a list of available printers and lets user easily	Computer	

		2000 Resource Kit Tools	Windows® 2000 Resource Kit				select a default printer.	Management
delprof.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		User Profile Deletion Utility	Deletes Windows 2000 user profiles.	Computer Management
delrp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Delete File and Reparse Points	Deletes a file or directory and any associated NTFS reparse points.	File & Disk
delsrv.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Delete Service	Unregisters a service with the service control manager.	Computer Management
internet	http://msdn.microsoft.com/ certification/default.asp	Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Designed for Windows Logo Program Web Site http://msdn.microsoft.com/certification/default.asp		Describes the technical requirements that must be satisfied by an application to receive the Designed for Windows logo.	Diagnostic
dh.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Display Heap	Displays information about heap usage in a user-mode process or pool usage in Kernel-mode memory.	Diagnostic
dhcmp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		DH Compare	Compares two dumps of heap usage generated by Dh.exe, matching the backtraces from each file, to find leaks.	Diagnostic
dhcploc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		DHCP Server Locator Utility	Locates DHCP servers on a network.	Network Management
dhcpobjs.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		DHCP Objects	In-process server (DLL) that exposes COM interfaces for automating DHCP Server administration.	Network Management
diruse.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Directory Disk Usage	Determines amount of disk space used by a directory's contents, similarly to UNIX's DU.	File & Disk
diskmap.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Diskmap	Displays information about a disk and the contents of its Partition Table.	File & Disk
diskpar.exe		Windows	Microsoft®	Separate		Disk Alignment Tool	Finds and modifies the starting sector on a disk to	Performance

		2000 Resource Kit Tools	Windows® 2000 Resource Kit				improve disk performance.	
diskuse.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Diskuse	Scans a directory tree and reports the amount of space used by each user.	File & Disk
dmdiag.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		DM Diagnostic	Saves disk volume configuration to a text file and writes a signature to a disk partition.	File & Disk
dommon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Domain Monitor	Monitors the status of servers and domain controllers for a domain and its trusted domains.	Diagnostic
drivers.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Drivers.exe: List Loaded Drivers	List Loaded Drivers	Displays information on installed device drivers, their files, and their code.	Performance
drmapsrv.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Drmapsrv.exe: Drive Share	Drive Share	Automatically configures NET SHARE and NET USE client drive for Terminal Server access.	Network Management
dsacls.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		DsAcls	Facilitates management of access-control lists for directory services.	Network Management
dsstore.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Directory Services Store	Manages Directory Services-based public key constructs.	Security
dumpcfg.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Dump Configuration	Simplifies the manual system recovery process associated with storage configuration.	File & Disk
dumpel.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Dump Event Log	Dumps an Event Log to a tab-separated text file.	Diagnostic
dumpfsmos.cmd		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Dump FSMO Roles	Dumps the Floating Single Master Operations roles.	Network Management
dupfinder.exe		Windows 2000 Resource Kit	Microsoft® Windows® 2000	Separate		Duplicate File Finder	Locates duplicate files for deletion or renaming.	File & Disk

		Tools	Resource Kit					
dureg.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Registry Size Estimator	Shows how much data is stored in the registry, or in any registry subtree, key or subkey.	Computer Management
efsinfo.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Encrypting File System Information	Displays information about encrypted files on NTFS partitions.	Security
elogdmp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Event Log Dump	Dumps information from a selected event log.	Computer Management
empty.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Empty	Frees the working set of a specified task or process.	Performance
enumprop.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Enumerate Properties	Dumps all properties set on any directory services object.	Diagnostic
exctrlst.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Extensibnle Performance Counter List	Displays information on extensible performance counter DLLs installed on a computer.	Performance
exetype.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Executable Type	Identifies the operating-system environment and processor required to run a particular executable file.	Diagnostic
expand.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		File Expansion Utility	Expands compressed files.	File & Disk
various		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Exploration Air	Demonstrates a sample e-commerce Web site for a fictional airline using Internet Information Services 5.0 and Windows 2000 Server.	IIS - Internet Information Services
extract.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Extract Cabinet	Extracts files from cabinet (.cab) files.	File & Disk
fcopy.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		File Copy for Microsoft Message Queue Server	Copies files and folders across LANs and WANs using Microsoft Message Queue Server.	File & Disk
filespy.exe		Windows	Microsoft®	Separate		File Spy	Allows users to monitor local and network drives to	File & Disk

		2000 Resource Kit Tools	Windows® 2000 Resource Kit				see what types of IRP and Fast I/O operations are running in the system.		
findgrp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Find Group	Gets a user's direct and indirect group memberships.		Network Management
floplock.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Lock Floppy Disk Drives	Locks a computer's floppy disks so that only members of the Administrators and PowerUsers groups can access them.		Network Management
forfiles.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		ForFiles	Enables batch processing of files in a directory or tree.		Scripting
freedisk.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Free Disk Space	Checks for free disk space, returning a 0 if there is enough space for an operation and a 1 if there isn't.		File & Disk
ftedit.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		FT Registry Information Editor	Edits the registry for fault tolerance settings.		File & Disk
getmac.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Get MAC Address	Gets a computer's MAC (Ethernet) layer address and binding order.		Diagnostic
getsid.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Getsid.exe: Get Security ID	Get Security ID	Compares the security IDs of two user accounts.		Network Management
gettype.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Get Type Version Information	Determines what kind of Windows operating system a computer is running and whether it is serving as a domain controller by querying the registry and setting ERRORLEVEL.		Scripting
global.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Global Groups	Lists contents of global groups across domains and workstations.		Network Management
gp.chm		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Windows 2000 Group Policy Reference	Provides detailed descriptions of the group policies in Windows 2000, describing the effect of enabling, disabling, and not configuring each policy, as well as explanations of how related policies interact.		Network Management
gpolmig.exe		Windows 2000 Resource Kit	Microsoft® Windows® 2000	Separate		Group Policy Migration	Migrates settings from Windows NT policy files to the Windows 2000 group policy object structure.		Deployment

		Tools	Resource Kit					
gptool.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Gpotool.exe: Group Policy Objects	Group Policy Objects	Allows administrators to check Group Policy object integrity and monitor policy replication.	Network Management
gpresult.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Gpresult.exe: Group Policy Results	Group Policy Results	Displays information about the result Group Policy has had on the current computer and logged-on user.	Network Management
grpcpy.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Group Copy	Copies the user names in an existing group to another group in the same or a different domain.	Network Management
guid2obj.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		GUID to Object	Maps a globally unique identifier (GUID) to a distinguished name.	Diagnostic
internet	http://www.microsoft.com/hcl/default.asp	Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Compatibility List Web Site http://www.microsoft.com/hcl/default.asp	Lists Windows NT and Windows 2000-compatible hardware.	Deployment
heapmon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Heapmon	Enables user to view system heap information.	Diagnostic
htmlfltr.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		HTML Text Filter	Removes comments and extra whitespace from HTML files.	IIS - Internet Information Services
httpcmd.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		HTTP Command	Provides a command-line HTTP client.	IIS - Internet Information Services
httpmon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		HTTP Monitoring Tool	A multithreaded service monitoring tool that gathers large amounts of data about a Web site.	IIS - Internet Information Services
iasparse.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		IAS Parse Tool	Parses Internet Authentication Service and Remote Access Service logs and converts them into a readable format.	Diagnostic
ie5ntwa.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Internet Explorer Web Accessories	Enhances Internet Explorer 5.	Internet Explorer
ierk5.chm		Windows	Microsoft®	Separate		Internet Explorer 5	Online version of the Internet Explorer 5 Resource Kit.	Internet

		2000 Resource Kit Tools	Windows® 2000 Resource Kit			Resource Kit		Explorer	
ifilttst.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Ifilter Test Suite	Validates IFilter implementations by calling IFilter methods and checking the returned values for compliance with the IFilter specification.	IIS - Internet Information Services	
ifmember.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Ifmember	Checks whether a user is a member of a specified group.	Network Management	
various		Windows 2000 Resource Kit Tools	*Windows 2000 Resource Kit* companion CD	Separate		IIS Migration Support Documents	Templates, forms, and checklists for use in migrating third-party Web servers and settings to Windows & 2000 Internet Information Services (IIS).	IIS - Internet Information Services	
various		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		IIS Permissions Wizard Template Maker	Assists in the creation of new permissions templates for use with Microsoft® Internet Information Server (IIS), version 5.0 and later.	IIS - Internet Information Services	
iishostsvc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		IIS Host Helper Service	Registers host header striongs as NetBIOS names allowing intranet users using WINS to access server by host name without DNS.	IIS - Internet Information Services	
iisv5migrationut ility_x86.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		IIS Migration Wizard	Migrates third-party Web servers and settings to Internet Information Server in Windows 2000.	IIS - Internet Information Services	
instaler.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Installlation Monitor	Tracks changes made by setup programs in the registry, .ini files, and other child processes.	Diagnostic	showinst.exe, undoinst.exe
instrsrv.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Service Installer	Installs and uninstalls executable services and assigns names to them.	Computer Management	
various		Windows 2000 Resource Kit Tools	*Windows 2000 Resource Kit* CD in the <Cdroot>\Ap ps\IEAK folder	Separate		Internet Explorer 5 Administation Kit	Enables administrators to create, distribute, and update customized installations of Microsoft® Internet Explorer.	Internet Explorer	
iisnt.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Internet Scanner	Network security scanner that generates comprehensive report detailing security vulnerabilities.	IIS - Internet Information Services	iis_nt.hlp

		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Interrupt Filter	Allows an administrator to direct a device's interrupts to a specific set of processors, which can improve performance on a multi-processor computer.	Computer Management	
intfiltr.exe									
insue.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Inuse.exe: File-In-Use Replace Utility	File-in-Use Replace Utility	Performs on-the-fly replacement of files currently in use by the operating system.	Computer Management	
ipsecpol.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Internet Protocol Security Policies Tool	Configures IP Security policies in the Directory Service or in a local or remote registry.	Network Management	
javareg.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Java/COM Registration Utility	Registers Java Classes, performing functions similar to Regsvr32.exe.	Computer Management	
kerbtray.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Kerbtray	Displays ticket information for a given computer running the Kerberos protocol.	Network Management	
kernprof.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Kernel Profiler	Provides counters for and profiles of various functions of the operating system kernel.	Diagnostic	
kix32.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		KiXtart 95	Processes logon scripts and provides an enhanced batch language.	Scripting	
klist.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Klist	Views and deletes the Kerberos tickets granted to the current logon session.	Network Management	
lbridge.cmd		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		L-Bridge	Command-line script that assists in migration from Windows NT 4.0 LMRepl to Windows 2000 File Replication Service.	Deployment	
leakyapp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Leaky Application	Appropriates system memory to test performance in low-memory situations.	Performance	
linkd.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Linkd	Links an NTFS directory to a target object.	File & Disk	
list.exe		Windows 2000	Microsoft® Windows®	Separate		List	Displays and searches a text file.	File & Disk	

		Resource Kit Tools	2000 Resource Kit					
local.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Local Groups	Lists contents of local groups across domains and workstations.	Network Management
logevent.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Event Logging Utility	Logs events to a local or remote computer.	Diagnostic
logoff.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Logoff	Logs off a user.	Network Management
logtime.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Logtime	Logs start or finish times of programs running in a batch file.	Scripting
lsreport.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Terminal Services Licensing Reporter	Generates log file with information about about licenses granted by Terminal Services license servers.	Diagnostic
lsview.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Terminal Services Licensing Server Viewer	Lists name and type of available Terminal Services license servers.	Diagnostic
mcast.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Mcast	Sends multicast packets or listens for packets being sent to a multicast group address.	Network Management
mcopy.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Multiply Copy	Copies files and creates a log of the operation.	File & Disk
metaedit.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Metabase Editor	Checks metabase integrity. Used in conjunction with the Metabase Browser/Editor.	IIS - Internet Information Services
mibcc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		SNMP MIB Compiler	Compiles Management Information Bases for Simple Network Management Protocol.	Diagnostic
moveuser.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Mover Users	Changes the security of a profile from one user to another, allowing for either the account domain or the user name to change.	Network Management

mscep.dll		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Certificate Enrollment Module for Routers - Cisco	ISAPI filter for Internet Information Server (IIS) that enables CEP Cisco Enrollment Protocol.	Network Management	
msinfosetup.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Microsoft System Information Extensions	Extensions used to view System Information Files created as .nfo files or Windows Report Tool-created .cab files within the System Information MMC snap-in.	Diagnostic	
msmqtrigers.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		MSMQ Triggers	Connects MSMQ messages with functionality in a COM component or standalone executable file.	Network Management	trigserv.exe, trigobjs.dll, trigsnap.dll, trigmon.exe
mtc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Multiple Tree Copy	Copies whole directory trees and their files.	File & Disk	
mtfcheck.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Microsoft Tape Format Vertification Tool	Verifies that tape media are Microsoft Tape Format compliant.	File & Disk	
netclip.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Remote Clipboard Viewer	Shows contents of clipboards on local and remote computers and enables users to cut and paste data between them.	Network Management	
netcons.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Net Connections	Displays current network connections.	Desktop	
netset.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		netset	Configures a variety of network parameters from the command prompt.	Deployment	
netsvc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Command-line Service Controller	Remotely starts, stops, and queries the status of services over a network.	Computer Management	
nlmon.ee		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		NL Monitor	Lists and tests domains and trust relationships.	Network Management	
now.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Now	Echos the current date and time plus any arguments passed to it.	Computer Management	
ntdetect.com		Windows 2000	Microsoft® Windows®	Separate		Startup Hardware Detector	Installd.cmd installs the debug (or checked) version of Ntdetect.com, Startup Hardware Detector, which is	Debugging	

				Separate				
		Resource Kit Tools	2000 Resource Kit				part of Microsoft® Windows® 2000.	
ntimer.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Ntimer	Measures how long a program runs.	Performance
ntrights.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Ntrights	Grants or revokes Windows 2000 rights to or from users or groups.	Network Management
oh.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Open Handles	Shows the handles of open windows, processes or objects.	Diagnostic
oidgen.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		OID Generator	Generates a pair of base Object Identifier values for use in extending the Acive Directory schema.	Network Management
oleview.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		OLE/COM Object Viewer	Browses, configures, and tests Microsoft Component Object Model classes installed on a computer.	Diagnostic
os2api.txt		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		OS/2 API Information	Describes which APIs for the OS/2 operating system are supported by Windows 2000 and which are not.	Diagnostic
pathman.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Path Manager	Adds or removes components of the system or user path.	Computer Management
perf2mib.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Performance Monitor MIB Builder Tool	Creates Management Information Bases based on Performance Monitor counters.	Performance
perfcheck.dll		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Performance Counter Check	Verifies performance counters from within Windows Scripting Host or from within an ASP page.	IIS - Internet Information Services
perfmon4.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Performance Monitor 4	Provides detailed data about system resources used by specific components of the operating system and programs designed to collect performance data.	Performance
Perfmtr.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Performance Meter	Displays performance statistics in a text-based format.	Performance

permcopy.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Permission Copy	Copies file- and share-level permissions from one share to another.	Network Management
perms.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		File Access Permissions per User	Displays a user's access permissions for a file or directory.	Network Management
pfmon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Page Fault Monitor	Lists the source and number of page faults generated by an application's function calls.	Performance
playback.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Playback	Records traffic accessing an IIS-based Web site and then replays that captured traffic.	IIS - Internet Information Services
various		Windows 2000 Resource Kit Tools	<cdroot> \Apps\Posix directory of the *Windows 200 0 Resource Kit* companion C	Separate		POSIX Utilities	Set of UNIX-like utilities recompiled to run on Windows NT and Windows 2000.	Scripting
prnadmin.dll		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Printer Administration Objects	Manages printers, printer drivers, and printer ports on local and remote computers.	Network Management
pstat.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Pstat.exe: Process and Thread Status	Process and Thread Status	Shows the status of all running processes and threads.	Performance
ptree.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Process Tree	Allows you to query the process inheritance tree and kill processes on local or remote computers.	Computer Management
pulist		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Pulist	Lists processes running on local or remote computers.	Computer Management
qgrep.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Qgrep	Performs string search routines on files, much like the POSIX tool Grep.exe.	File & Disk
qslice.exe		Windows 2000	Microsoft® Windows®	Separate		CPU Usage by Processes	Shows the percentage of total CPU usage per process.	Performance

		Resource Kit Tools	2000 Resource Kit						
Qtcp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Qtcp	Measures end-to-end network service quality.	Diagnostic	
quickres.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Quick Resolution Changer	Changes display settings without restarting the computer.	Desktop	
quiktray.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Quick Try	Organizes the icons in the status area of the Windows 2000 desktop.	Desktop	
raslist.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		RAS List	Displays Remote Access Service server announces from a network.	Network Management	
rassrvmon.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Rassrvmon	Monitors and logs statistics on a Remote Access Service server.	Network Management	
rasusers.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Enumerating Remote Access Users	Lists Remote Access Service users on a domain or server.	Network Management	
rdpclip.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate	Rdpclip.exe: File Copy	File Copy	Copies files between Terminal Services server and client.	Network Management	
reducer.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Reduce Trace Data	Processes one or more trace log files and produce a per-process, per-thread workload profile.	Computer Management	
regback.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Registry Backup	Backs up all or part of the registry.	Computer Management	
regdmp.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Registry Dump	Dumps of all or part of the registry to standard output.	Computer Management	
regentry.chm		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Technical Reference to the Windows 2000 Registry	Explains registry entries in detail.	Computer Management	

regfind.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Regfind	Searches and optionally replaces registry data.	Computer Management	
regini.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Registry Change by Script	Modifies registry entries with a batch file.	Computer Management	
regrest.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Registry Restoration	Restores all or part of the registry.	Computer Management	
remapkey.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Remap Windows Keyboard Layout	Changes keyboard layout by remapping the scancode of keys.	Desktop	
rscripts.chm		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Administration Scripts	Visual Basic scripts for administering Active Directory through Active Directory Services Interface.	Network Management	
rcmd.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Command Service	Provides secure client and server for remotely running command-line programs.	Network Management	rcmdsvc.exe
rclient.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Remote Console	Enables a client to run a command-line session remotely on computers running the corresponding service.	Network Management	oemsetup.inf, rcongrp.exe, rconmode.exe, rconmsg.dll, rconstat.exe, rconsvc.exe, rcruncmd.exe, rsetup.exe
wrkill.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Remote Process Kill	Enumerates and quits processes on a remote computer	Network Management	
robocopy.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Robust File Copy Utility	Maintains multiple mirror images of large folder trees on network servers.	File & Disk	
rpingc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		RPC Connectivity Verification Tool	Checks whether Windows 2000 Server services are responding to remote procedure call requests from network clients.	Diagnostic	
rpcdump.exe		Windows	Microsoft®	Separate		RPC Dump	Dumps all the endpoints in the endpointmapper	Diagnostic	

		Source	Package			Name	Description	Category	
		2000 Resource Kit Tools	Windows® 2000 Resource Kit				database, pings each endpoint, gathers some other information, sorts it, and outputs the data.		
rshsvc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		TCP\IP Remote Shell Service	Provides a command-line shell or single command run service for remote users.	Network Management	
rsm_dbic.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Removable Storage Integrity Checker	Checks the integrity of the RSM database for media and removable media drives and libraries.	File & Disk	
rsm_dbutil.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Removable Storage Database Utility	Steps through the RSM database and inspects each database object attribute for valid values and referential integrity.	File & Disk	
rsmconfg.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Removable Storage Manual Configuration Wizard	Aids in manually configuring libraries that RSM's autoconfiguration can't, from the command prompt.	File & Disk	
runext.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Run Extension	Adds a **Run** command to the Windows Explorer context menu.	Desktop	
sc.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Service Controller Tool	Retrieves information about services from Service Controller.	Computer Management	
scanreg.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Registry Scan	Searches for a string in registry key names, value names and value data.	Computer Management	
sclist.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Sclist	Shows services and their status.	Computer Management	
sectemplates.msc		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Security configuration and Anlysis Tool IIS Template	Helps defines Internet Information Services (IIS) security policies through IIS Security Templates.	IIS - Internet Information Services	
sendfile.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		SendFile Test Suite	Demonstrates the relative performance of ISAPI versus ASP versus CGI versus static content on a Web site.	Performance	
setedit.exe		Windows 2000 Resource Kit	Microsoft® Windows® 2000	Separate		PerfMon Chart Setting Editor	Edits Performance Monitor chart settings files.	Performance	

		Tools	Resource Kit						
setspn.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Maniputlate Service Principal Names for Accounts	Manages the Service Principal Names directory property for an Active Directory account.	Network Management	
setupmgr.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Setup Manager	The Setup Manager deployment tool is a wizard that assists system administrators in installing Windows 2000 on multiple computers	Deployment	
setx.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Setx	Sets environmental variables in the the user or computer environment.	Computer Management	
showacls.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Show ACLs	Enumerates access rights for files, folders, and trees.	Network Management	
showdisk.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Show Disk Space	Displays configuration and fault-tolerance information for primary partitions and logical drives.	File & Disk	
showgrps.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Show Groups	Shows the groups to which a user belong.	Network Management	
showmbrs.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Show Members	Shows the user names of members of a group.	Network Management	
showperf.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Performance Data Block Dump Utility	Dumps the contents of the Performance Data block so you can view and debug the raw data structure.	Performance	
showpriv.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Show Privilege	Displays the users and groups granted a particular privilege on the local computer.	Computer Management	
shutdown.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Remote Shutdown	Shuts down or reboots a local or remote computer.	Network Management	
sipanel.exe		Windows 2000 Resource Kit Tools	Microsoft® Windows® 2000 Resource Kit	Separate		Soft Input Panel	Allows computers to use a pen device for input.	Desktop
