## Acceptable Use

### Policy

Corporate information and information resources shall be used in an approved, ethical, and lawful manner to avoid loss or damage to Corporate operations, image, or financial interests and to comply with official acceptable use policies and procedures.

Personnel shall contact the chief information security officer (CISO) prior to engaging in any activities not explicitly covered by these policies.

### Roles and Responsibilities

The roles and responsibilities for acceptable use are defined in the following sections and depicted in Exhibit 1.

#### Chief Privacy Officer

The chief privacy officer shall be responsible for developing policy on corporate privacy issues.

#### Executive Sponsors

Executive sponsors shall be responsible for the following:

- a) Informing personnel of corporate policies on acceptable use of information resources.
- b) Ensuring that application development personnel under their supervision comply with these policies and procedures.
- c) Ensuring that contract personnel under their supervision comply with these policies and procedures.

#### All Managers

Managers at all levels shall be responsible for the following:

- a) Informing personnel of corporate policies on acceptable use of information resources.
- b) Ensuring that personnel under their supervision comply with these policies and procedures.

#### System Administrators

System administrators shall be responsible for the following:

- a) Monitoring systems for misuse.
- b) Promptly reporting suspicion or occurrence of any unauthorized activity.

#### Chief Information Security Officer

The chief information security officer (CISO) shall be responsible for the following:

- a) Developing acceptable use policy.
- b) Developing awareness and training materials.

#### All Personnel

All personnel shall be responsible for the following:

- a) Abiding by official corporate policies on acceptable use of information resources.

- b) Promptly reporting suspicion or occurrence of any unauthorized activities.
- c) Any use made of their accounts, logon IDs, passwords, PINs, and tokens.

**Auditors**

Auditors shall be responsible for compliance auditing.

**Exhibit 1, Acceptable Use Responsibilities**

| Activity                                      | Executive Sponsors | All Managers | System Admins | CISO | All Personnel | Auditors |
|---|--------------------|--------------|---------------|------|---------------|----------|
| Inform Users                                  | X                  | X            |               | X    |               | A        |
| Implement User Sanctions                      | X                  | X            |               | C    |               | A        |
| Acquire Hardware and Software Properly        | X                  | X            |               | C    |               | X/A      |
| Comply with Copyright and Licensing           | X                  | X            | X             | X    | X             | X/A      |
| Comply with Personally-owned Software Policy  | X                  | X            | X             | X    | X             | X/A      |
| Protect Intellectual Property                 | X                  | X            | X             | X    | X             | X/A      |
| Comply with Electronic Mail Policy            | X                  | X            | X             | X    | X             | X/A      |
| Comply with Electronic Mail Encryption Policy | X                  | X            | X             | X    | X             | X/A      |
| Comply with Internet Policy                   | X                  | X            | X             | X    | X             | X/A      |
| Comply with Information Resources Policy      | X                  | X            | X             | X    | X             | X/A      |

- X = Responsible for Accomplishment
- C = Consulting Support as Required
- A = Independent Compliance Auditing

**Ensuring Compliance**

The Corporation owns all Corporate information resources; use of such resources constitutes consent for the Corporation to monitor, inspect, audit, collect, and remove any information without permission or further notice. Personnel shall be trained in what use is acceptable and what is prohibited. Any infraction of corporate acceptable use policies shall constitute a security violation. Personnel shall be held personally accountable and may be subject to disciplinary action or criminal prosecution.

**Hardware and Software**

**Acquiring Hardware and Software**

To prevent the introduction of malicious code and protect the integrity of corporate information resources, all hardware and software shall be obtained from official

corporate sources.

#### Complying with Copyright and Licensing

All software used on corporate information resources shall be procured in accordance with official corporate policies and procedures, and shall be licensed, and registered in the name of the corporation. All personnel shall abide by software copyright laws and shall not obtain, install, replicate, or use software except as permitted by the software licensing agreements.

#### Using Personally owned Software

To protect the integrity of the corporate information resources, personnel shall not use personally owned software on corporate information resources. This includes purchased and licensed applications; shareware; freeware; downloads from bulletin boards, Internet, Intranet, FTP sites, local area networks (LANs) or wide area networks (WANs); and other personally-owned or controlled software.

#### Protecting Intellectual Property

To ensure the integrity of corporate developed software, all personnel shall abide by the intellectual property protection contract provisions of the corporation.

#### **Electronic Mail and Messaging**

Access to the corporate electronic mail (email) system is provided to personnel whose duties require it for the conduct of corporate business. Since email may be monitored, all personnel using corporate resources for the transmission or receipt of email shall have no expectation of privacy.

#### Acceptable Use

The corporate provides email to facilitate the conduct of corporate business. Occasional and incidental personal email use shall be permitted if it does not interfere with the corporation's ability to perform its mission and meets the conditions outlined in official corporate directives. However, while they remain in the system, personal messages shall be considered to be in the possession and control of the corporation.

#### Prohibited Use

Prohibited activities when using corporate electronic mail shall include, but not be limited to, sending or arranging to receive the following:

- a) Information that violates state or federal laws, or corporate regulations.
- b) Unsolicited commercial announcements or advertising material, unless approved by management in advance.
- c) Any material that may defame, libel, abuse, embarrass, tarnish, present a bad image of, or portray in false light, the corporation, the recipient, the sender, or any other person.
- d) Pornographic, racist or offensive material, chain letters, unauthorized mass mailings, or malicious code.

## Encryption

Encrypting electronic mail or messages shall comply with the following:

- a) Use encryption software and the methods approved by official corporate sources.
- b) Place the key or other similar file for all encrypted electronic mail in a directory or file system that can be accessed by management personnel prior to encrypting email.
- c) Supply the key or other device needed to decrypt the electronic mail upon request by authorized corporate management.

## Authorized Monitoring

System administrators and other personnel with unrestricted access to email and similar services shall receive management approval prior to decrypting or reading the email traffic of other personnel. If management approval is not immediately available, then system administrators and other personnel that intercept, read, or restrict email accounts shall document their actions and provide that documentation to management personnel within twenty-four (24) hours.

## Internet

Access to the Internet is available to employees, contractors, subcontractors, and business partners, whose duties require it for the conduct of corporate business. Since Internet activities may be monitored, all personnel accessing the Internet shall have no expectation of privacy.

## Acceptable Use

The corporation provides Internet access to facilitate the conduct of corporate business. Occasional and incidental personal Internet use shall be permitted if it does not interfere with the work of personnel, the corporation's ability to perform its mission, and meets the conditions outlined in official corporate directives.

## Prohibited Use

Prohibited activities when using the Internet include, but are not limited to, the following:

- a) Browsing explicit pornographic or hate-based web sites, hacker or cracker sites, or other sites that the corporation has determined to be off-limits.
- b) Posting, sending, or acquiring sexually explicit or sexually oriented material, hate-based material, hacker-related material, or other material determined to be off-limits.
- c) Posting or sending sensitive information outside of the corporation without management authorization.
- d) Using other services available on the Internet, such as FTP or Telnet, on systems for which the user does not have an account, or on systems that have no guest or anonymous account for the service being used.
- e) Posting commercial announcements or advertising material.
- f) Promoting or maintaining a personal or private business.

- g) Receiving news feeds and push data updates, unless the material is required for corporate business.
- h) Using non-work related applications or software that occupy excess workstation or network processing time (e.g., processing in conjunction with screen savers).

### **Generally Prohibited Uses of Information Resources**

Generally prohibited activities when using corporate information resources shall include, but are not limited to, the following:

- a) Stealing or copying of electronic files without permission.
- b) Violating copyright laws.
- c) Browsing the private files or accounts of others, except as provided by appropriate authority.
- d) Performing unofficial activities that may degrade the performance of systems, such as the playing of electronic games.
- e) Performing activities intended to circumvent security or access controls of any organization, including the possession or use of hardware or software tools intended to defeat software copy protection, discover passwords, identify security vulnerabilities, decrypt encrypted files, or compromise information security by any other means.
- f) Writing, copying, executing, or attempting to introduce any computer code designed to self-replicate, damage, or otherwise hinder the performance of or access to any corporate computer, network, or information.
- g) Accessing the corporate network via modem or other remote access service without the approval of corporate management.
- h) Bringing discredit to the corporation, its personnel or business partners.
- i) Promoting or maintaining a personal or private business, or using corporate information resources for personal gain.
- j) Using someone else's logon ID and password.
- k) Conducting fraudulent or illegal activities, including but not limited to: gambling, trafficking in drugs or weapons, participating in terrorist acts, or attempting unauthorized entry to any corporate or non-corporate computer.
- l) Conducting fundraising, endorsing any product or service, lobbying, or participating in any partisan political activity.
- m) Disclosing any corporate information that is not otherwise public.
- n) Performing any act that may defame, libel, abuse, embarrass, tarnish, present a bad image of, or portray in false light, the corporation or any person.
